Design details

Our service include :

- Ergonomic design based on ISO 11064
- Experienced design team
- 3D Layout planning service
- Cutting edge design software
- Concept drawings
- Dedicated project manager
- Design Mock Up & Prototyping
- Delivery & Installation

The often highly technical Oil and Gas industry has its own unique challenges, monitor and control often being one critical area. Adarsha expertise in the design and layout of control room consoles, and bespoke control room furniture provide customers with an ergonomic and efficient solution.

Increasingly control rooms are operating 24 hours a day 365 days a year, with many different types of systems and equipment's located into a single room.

Oil & gas

Utilising our Centra Command Console, Adarsha are able to provide solutions from small to large scale new control rooms or retrofits complying with the requirements of materials, project specific features such as offshore environments and materials. Adarsha provides the definitive solution

Oil & gas

Features:

- Modular & Flexible
- Technology Independent
- Offshore Compliant Materials

Oil&gas

Solutions For :

- Refineries
- Up & Down stream Control
- On & Offshore Terminals
- Liquefied Natural Gas Terminals
- Gas to Liquids Terminals
- Plant Control
- Remote Pumping Stations

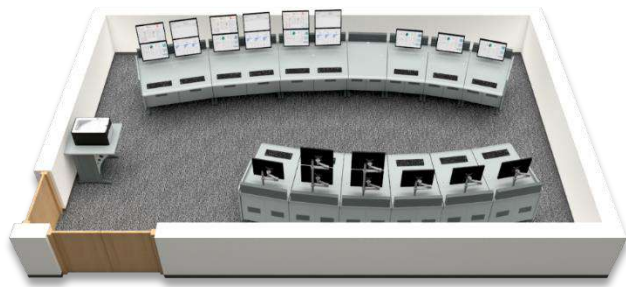

security

Security

Adarsha designs can incorporate anything from Single Operator consoles for small applications such as car parks and reception monitoring, through to projects with multiple Control Rooms for Infrastructure, Transport and National Security.

All designs are based on future expansion with modification being possible at any time in the future. The majority of our desks are used 7 days a week 24 hours a day 365 days a year. We therefore recognise the importance of operator comfort.

Control room

Control room

For many businesses the control room is the heart of the operation, where many processes are undertaken and key decisions are made on a daily basis. Adarsha believe that it is vitally important to create an efficient and ergonomic environment which functions correctly, especially during periods of critical demand.

In many cases the control room reflects the image of a company and can be the face of the organisation; therefore the design and layout of the control room can become a major issue during the construction phase

At Adarsha, we use our experience and knowledge to assess those requirements and, based on the type of operation, the size of the location and numbers of operators, design and recommend the right solution using our modular Centra Command Console.

Prior to manufacture and installation we offer a free 3D colour rendering service. This provides all stakeholders with a true life visualisation of their chosen Control Room design.

Control room

Features:

- Oil & Gas
- Petrochemical
- Power Generation
- Air Traffic Control
- Broadcast

Control room

Solutions For :

- Control Rooms
- Border Control
- Command Centers
- Data Centers
